

Preliminary announcement

To be held in Yokohama-Japan in Autumn 2010!

Admission Free

G-spatial EXPO

— Positioning and geospatial information - New global infrastructure —

Date: September 19~21, 2010

Venue: PACIFICO YOKOHAMA (1-1-1, Minato Mirai, Nishi-ku, Yokohama, Kanagawa 220-0012 Japan)

Organizer: G-spatial EXPO executive committee

consisting of academic institutions, public administrative organizations and associations representing relevant industries in Japan

Industry, academia and administration are cooperating to hold G-spatial EXPO- the first ever exhibition to focus on exploring technologies and services applied to the present and future G-spatial society (Advanced Geospatial Information Society).

At the G-spatial EXPO, lectures, symposiums and exhibition of products and services will be held. Also opportunities for information exchange among industries, academia and administration will be provided.

The objectives of the G-spatial EXPO Exhibition are to promote the use of space-based positioning technologies and also the creation of new type of business utilizing geospatial information, by inviting presentation of proposals and innovative ideas from the private sector on new business, new services and further improvement of existing services.
